

MAYA PATEL

Machine Learning Engineer

Summary

Machine learning engineer building reliable training and inference workflows with Python.

Experience

Machine Learning Engineer, Signal Forge, Aug 2021 - Present

Developed Python feature pipelines and trained classification models for operational forecasting.

Improved experiment tracking and introduced validation checks for production datasets.

Data Scientist, River Analytics, Jan 2019 - Jul 2021

Created statistical models and communicated findings to engineering and product stakeholders.

Projects

Production Inference Platform, Mar 2023 - Present

Deployed containerized ML inference services to Kubernetes and configured health checks, resource limits, and rolling updates.

Built monitoring dashboards and incident runbooks for the production ML system.

Skills

Python, machine learning, Docker, SQL
